

LOAD UP YOUR BATTERIES – SUMMER SCHOOL 2019 in LANDSHUT, GERMANY

Due to challenges in climate change as well as energy and water scarcity, the development of advanced technical solutions under specific local boundary conditions becomes urgently necessary.

Landshut University of Applied Sciences accompanies these challenges in the region with different projects and solutions.

Thus it is a good choice for your **INTERNATIONAL SUMMER SCHOOL “RENEWABLE ENERGIES”**.

COURSE CONTENT

The course “Renewable Energies” gives you a holistic understanding in the fields of **heating technology of the future, decentralized energy systems and more.**

The program **combines lectures with practical examples and excursions to industry** companies. In addition to this academic course content there are numerous opportunities to experience German culture through a cultural and leisure program.

TARGET GROUP

Bachelor students 3rd+4th semester of Engineering Sciences

WHY LANDSHUT

- One of Bavaria’s most interesting regions next to Munich
