Installation of FortiClient on MacOS:

On the homepage of the manufacturer Fortinet you will find under

<https://www.fortinet.com/support/product-downloads#vpn>

(<https://www.fortinet.com/support/product-downloads#vpn>) the installation files, scroll to „FortiClient VPN“ and use the corresponding button under Download VPN for MacOS .

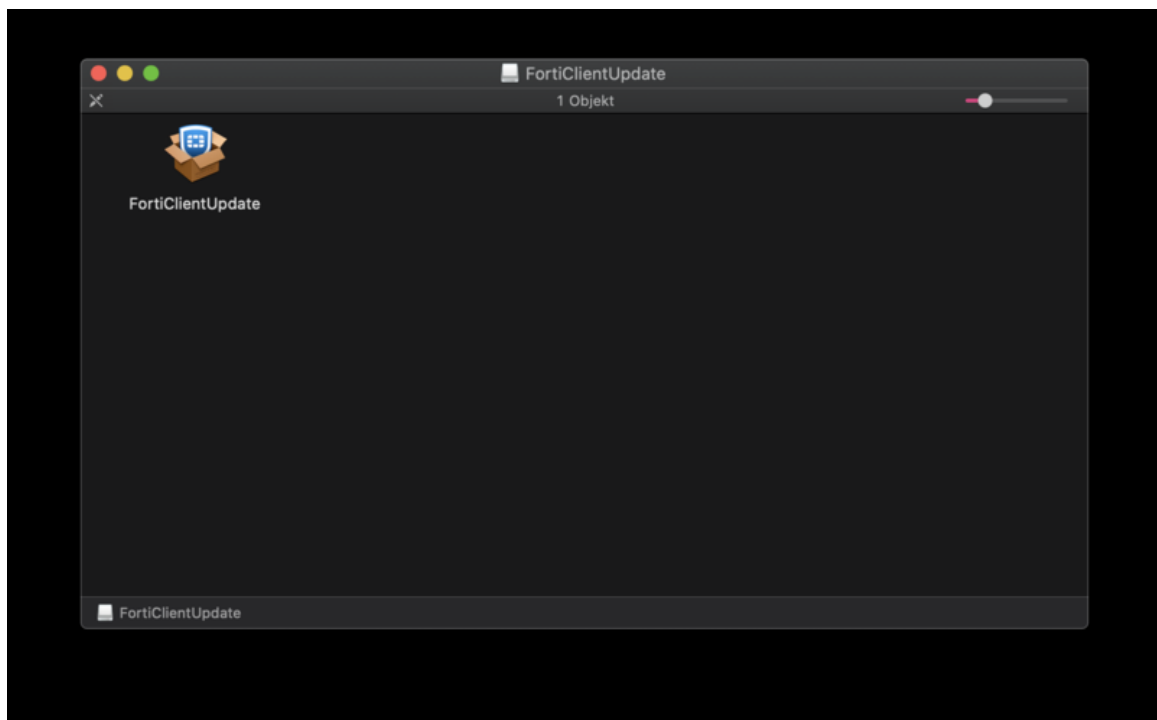

Important: If the download from the manufacturer does not work, you can choose from one of the two mirrors:

Direct link1

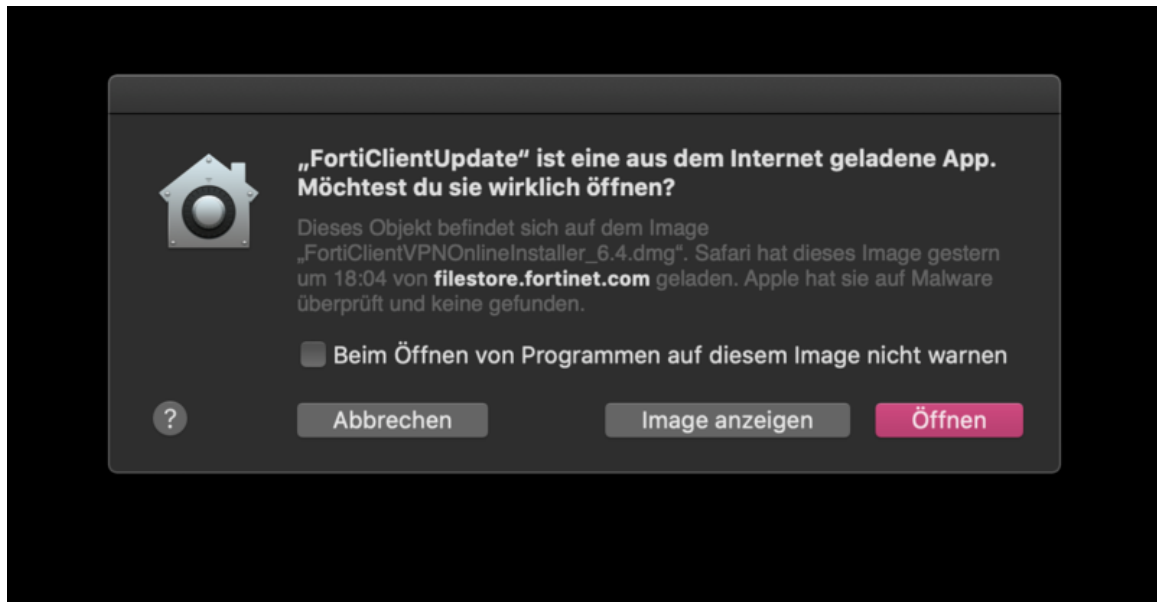

Direktlink2 ([https://www.haw-](https://www.haw-landshut.de/static/Service_IT/Dateien/vpn/FortiClientVPN_7.4.3.6667_OnlineInstaller.dmg.zip)

[landshut.de/static/Service_IT/Dateien/vpn/FortiClientVPN_7.4.3.6667_OnlineInstaller.dmg.zip](https://www.haw-landshut.de/static/Service_IT/Dateien/vpn/FortiClientVPN_7.4.3.6667_OnlineInstaller.dmg.zip))

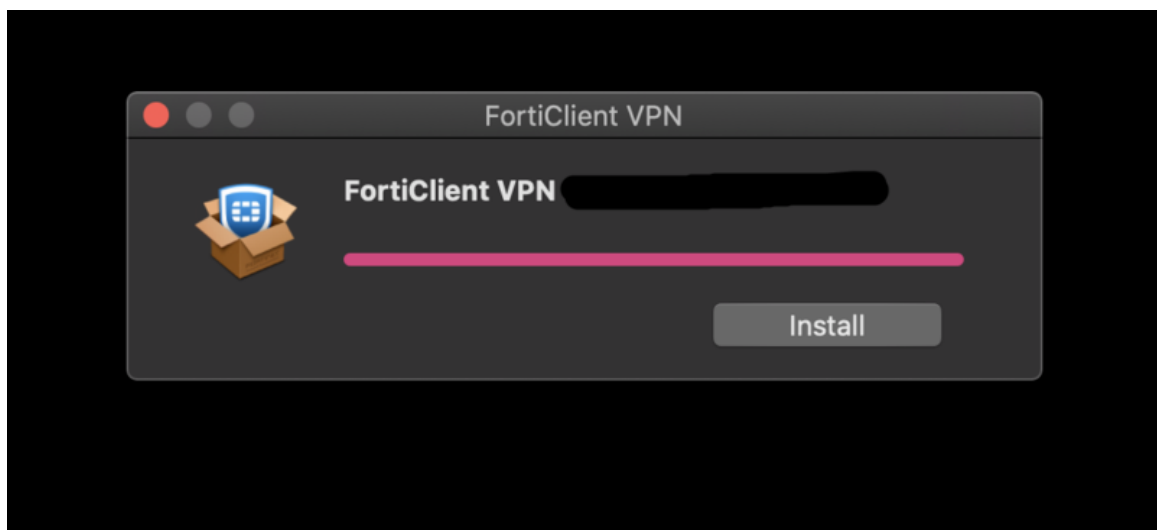

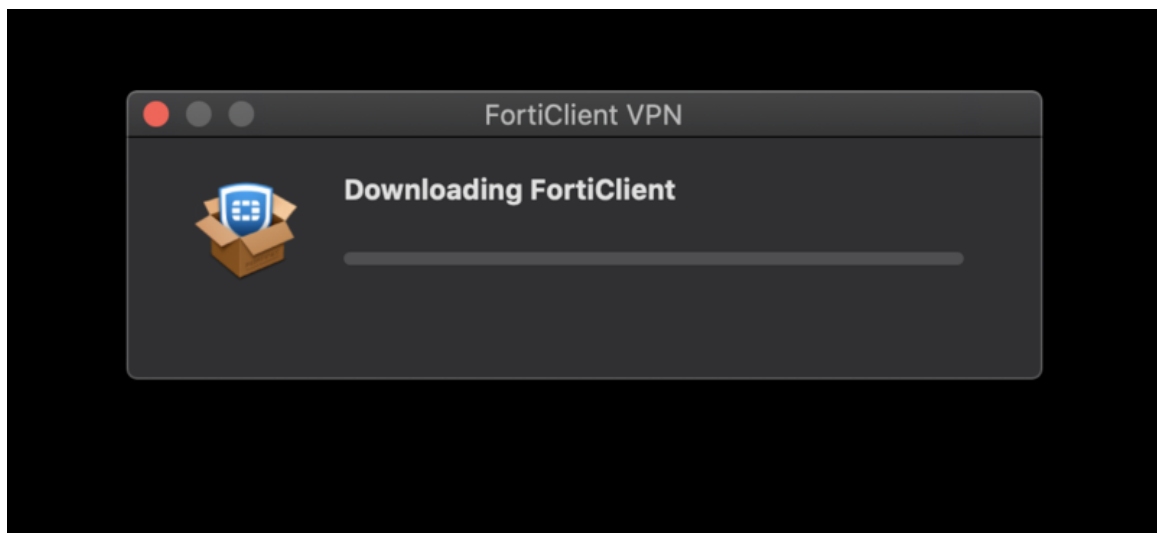

Start the download with the online installer for Big Sur and Monterey:

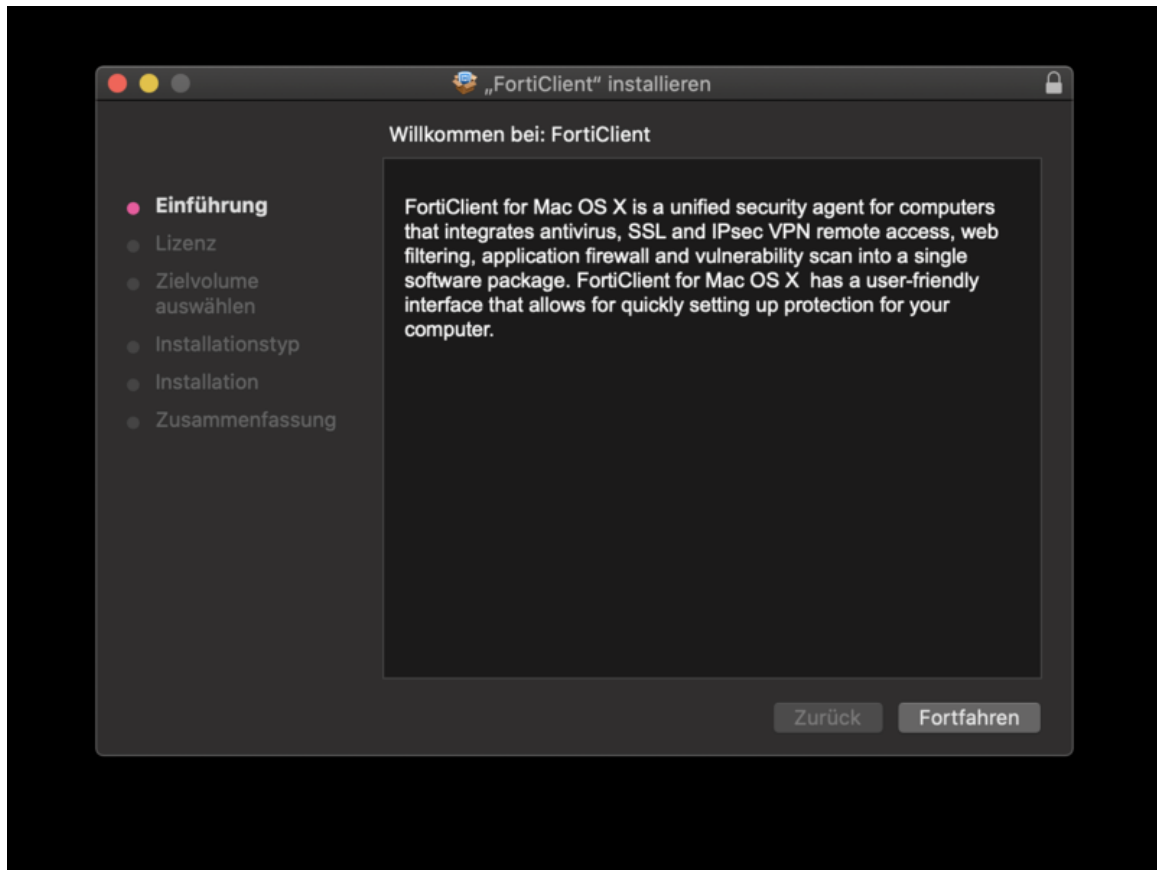

A message appears stating that this installer has been downloaded from the Internet. To run this `open` is selected.

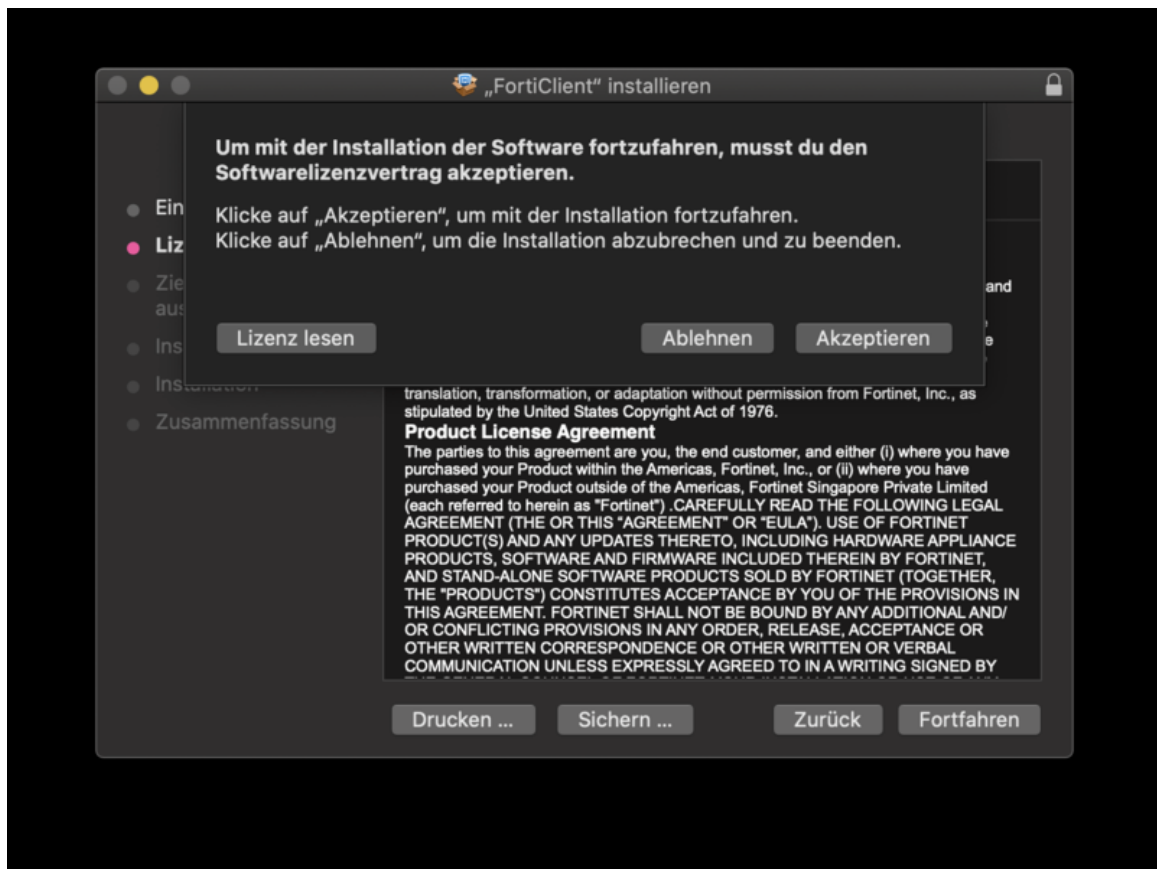

Click on this to start the installation.

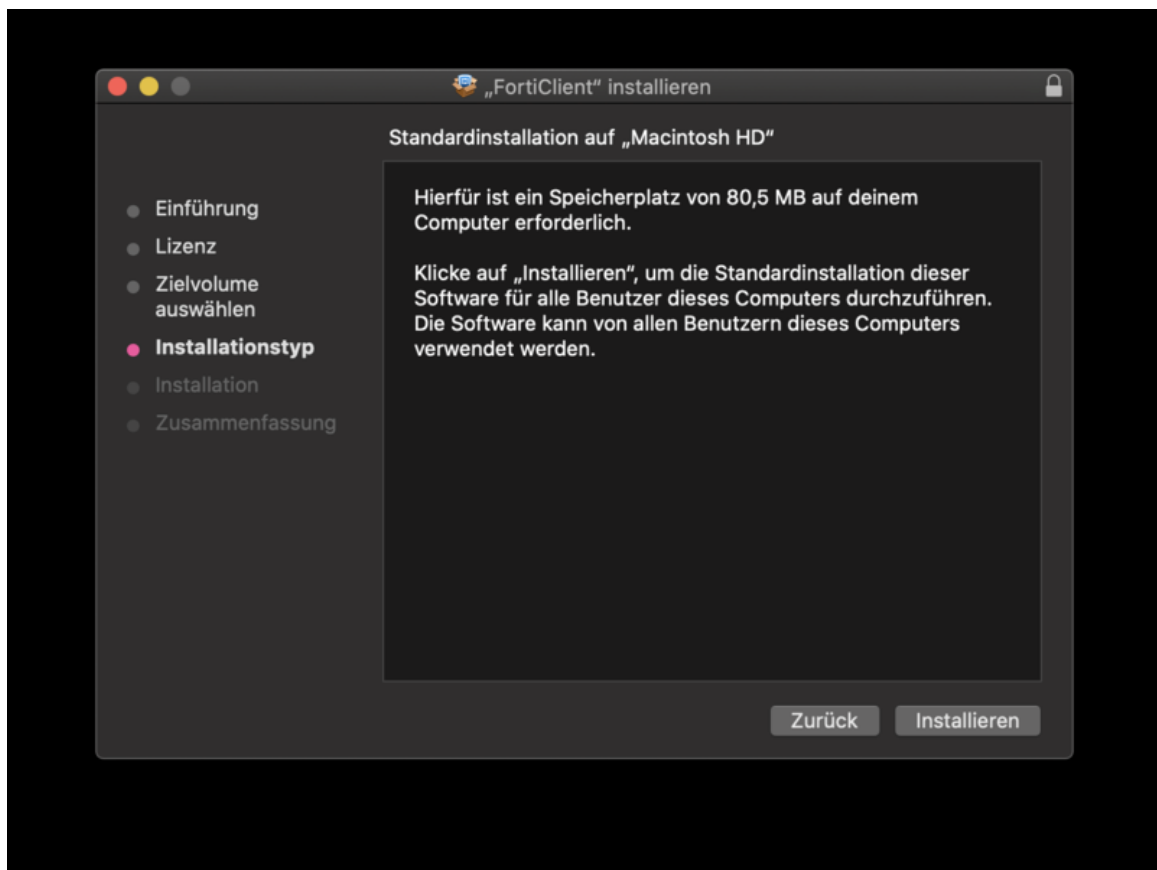

Installation:

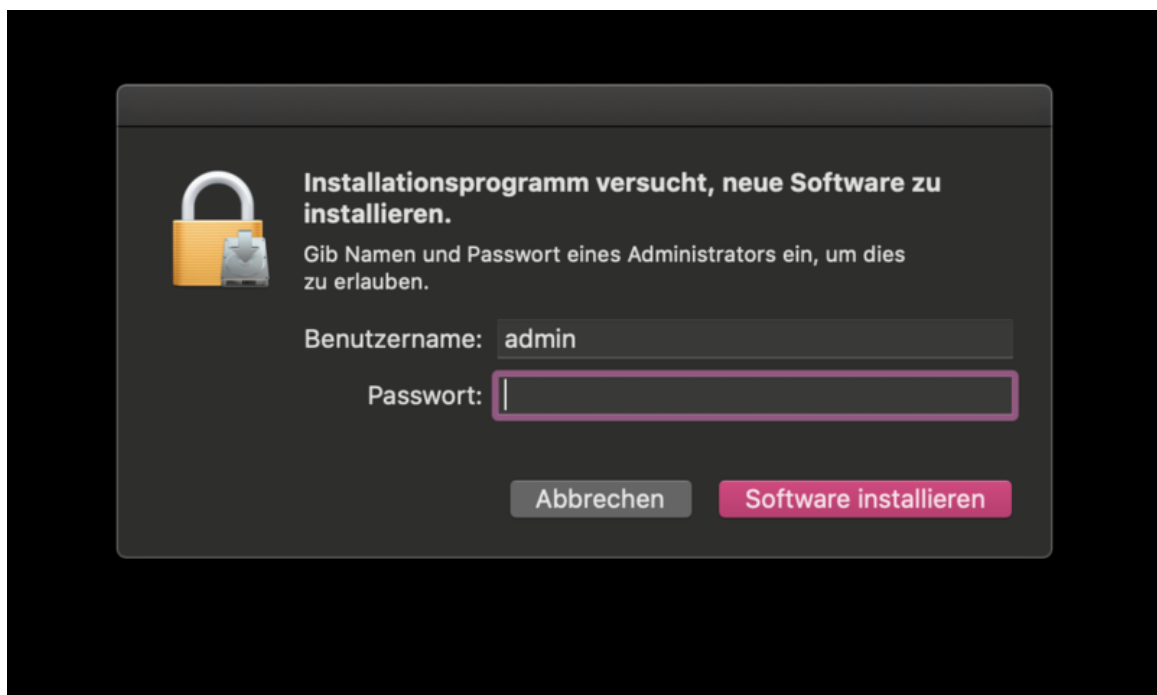

Click on „Continue“.

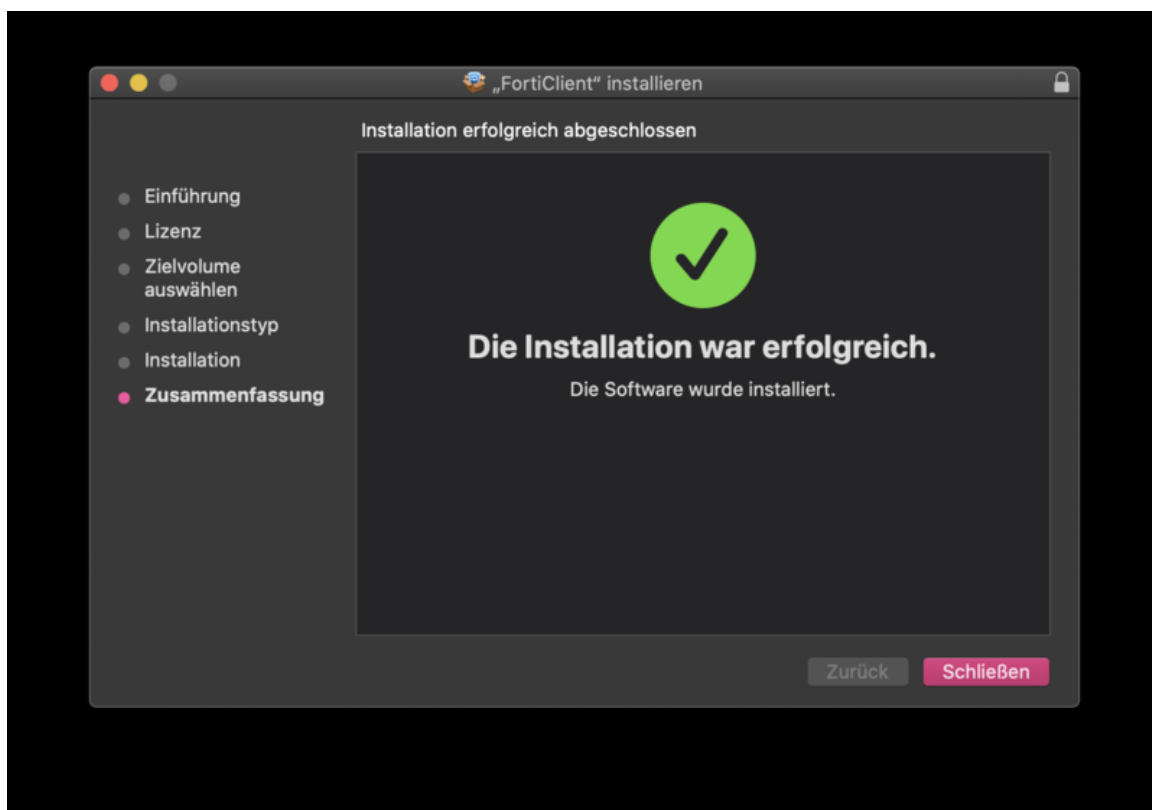

The licence conditions are accepted by clicking on „Continue“ and then clicking on „Accept“ in the pop-up.

Click on „Install software“ and enter the admin password.

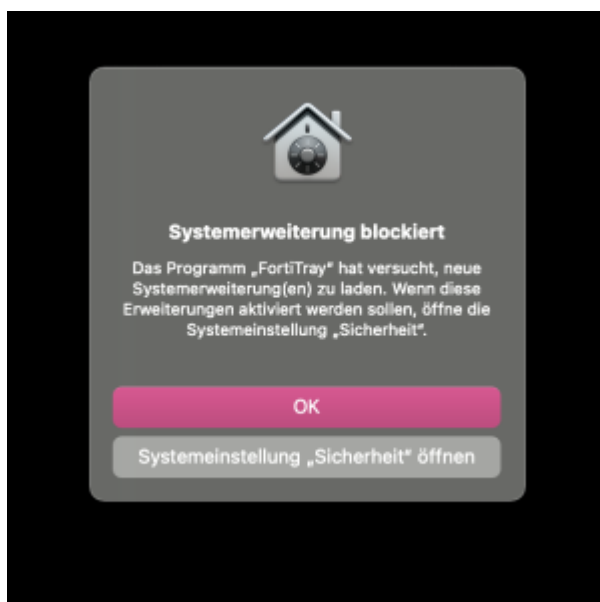

The installation is successfully completed as soon as this window appears:

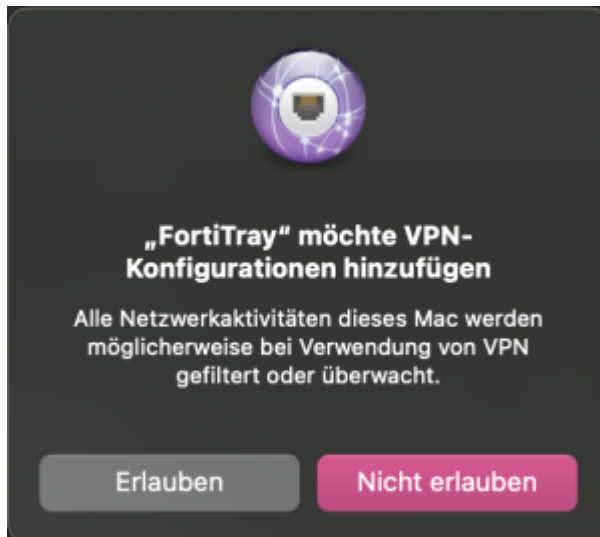

Additional authorisations for Monterey

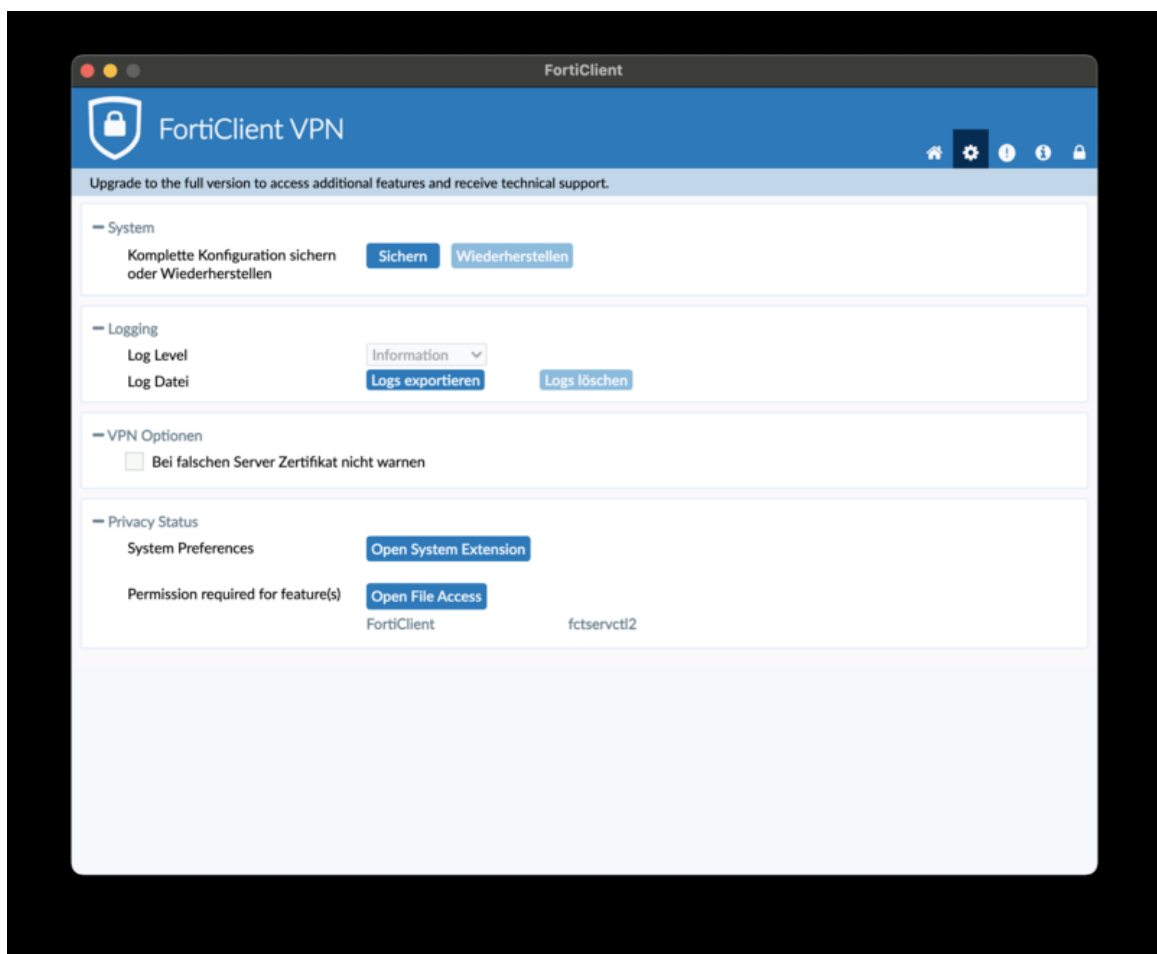

FortiClient 7 displays the following message that extensions are blocked:

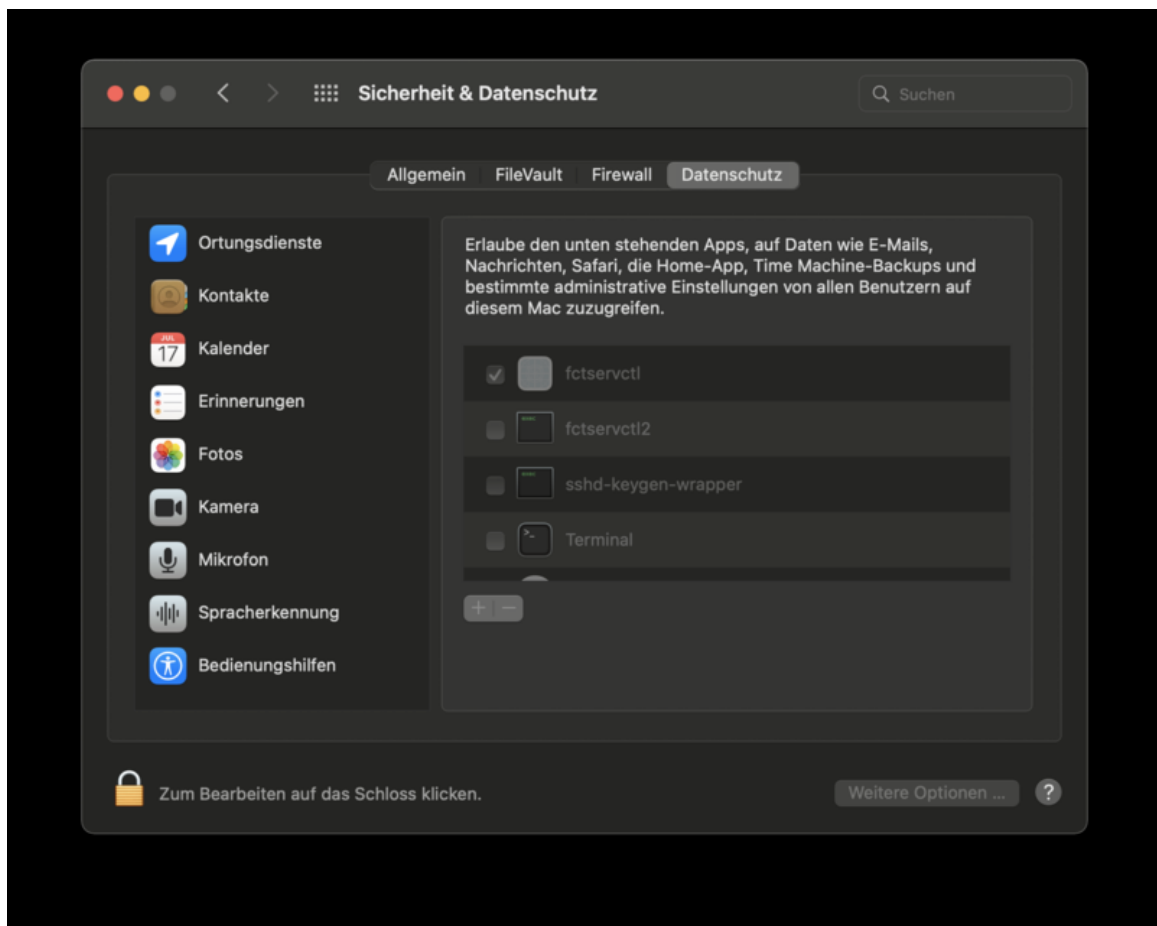

Therefore, the system settings are opened by clicking on „Open system settings „Security““.

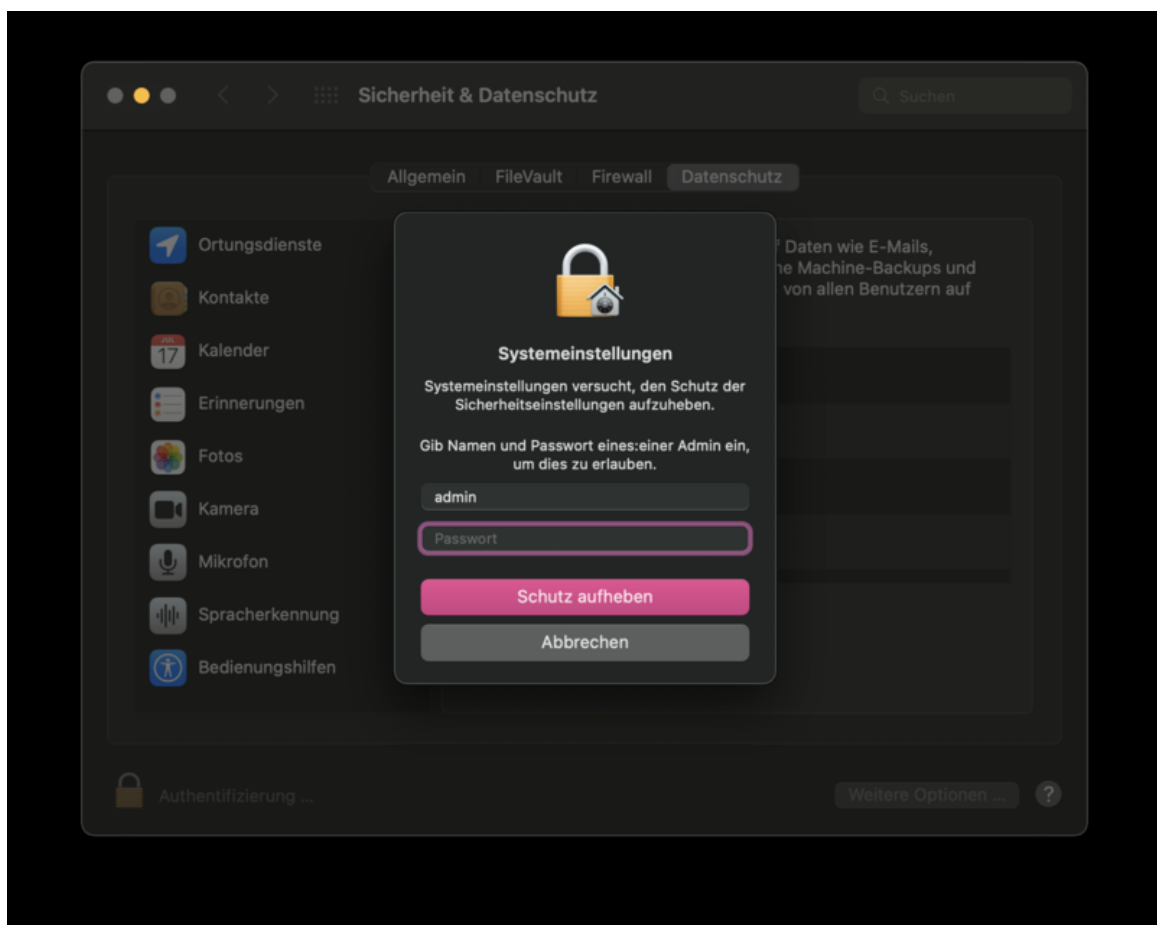

„Allow“ must be selected here.

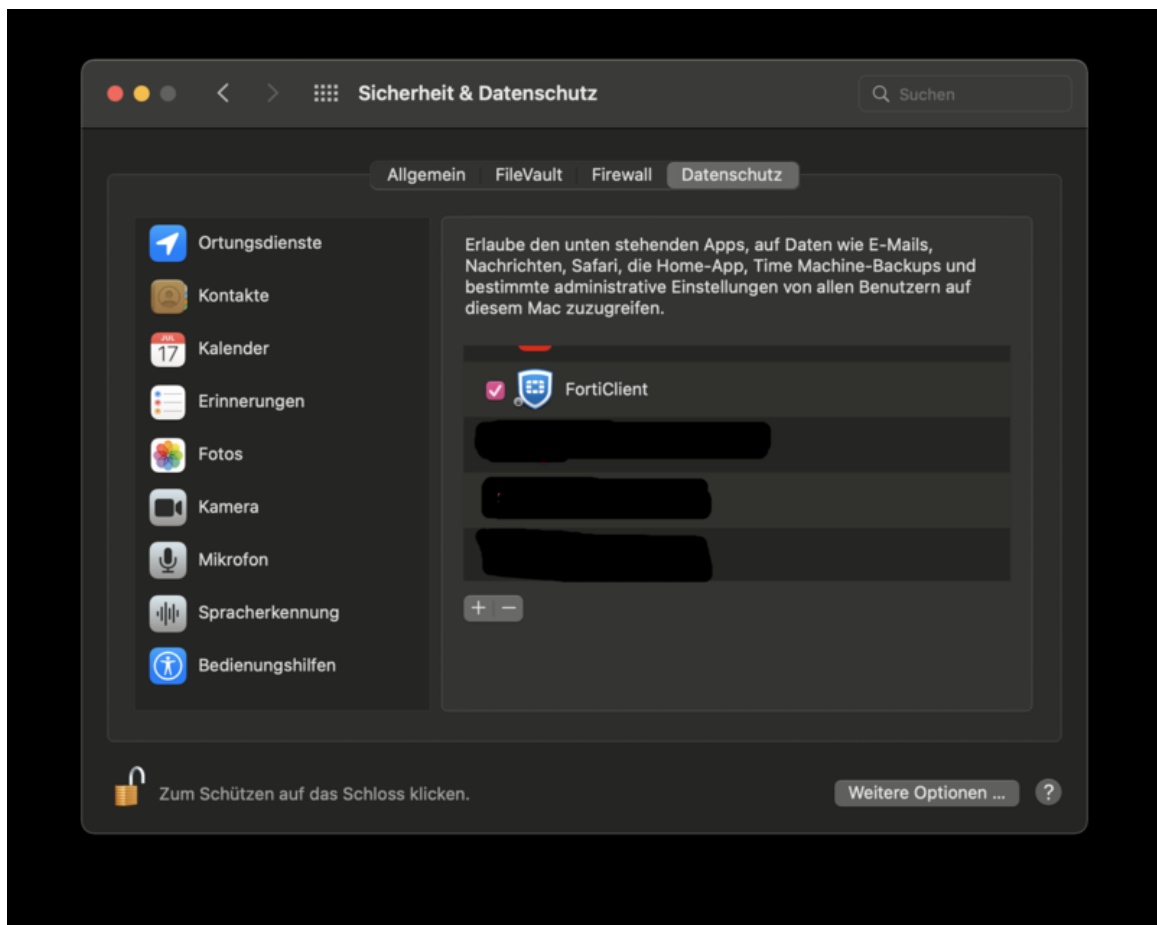

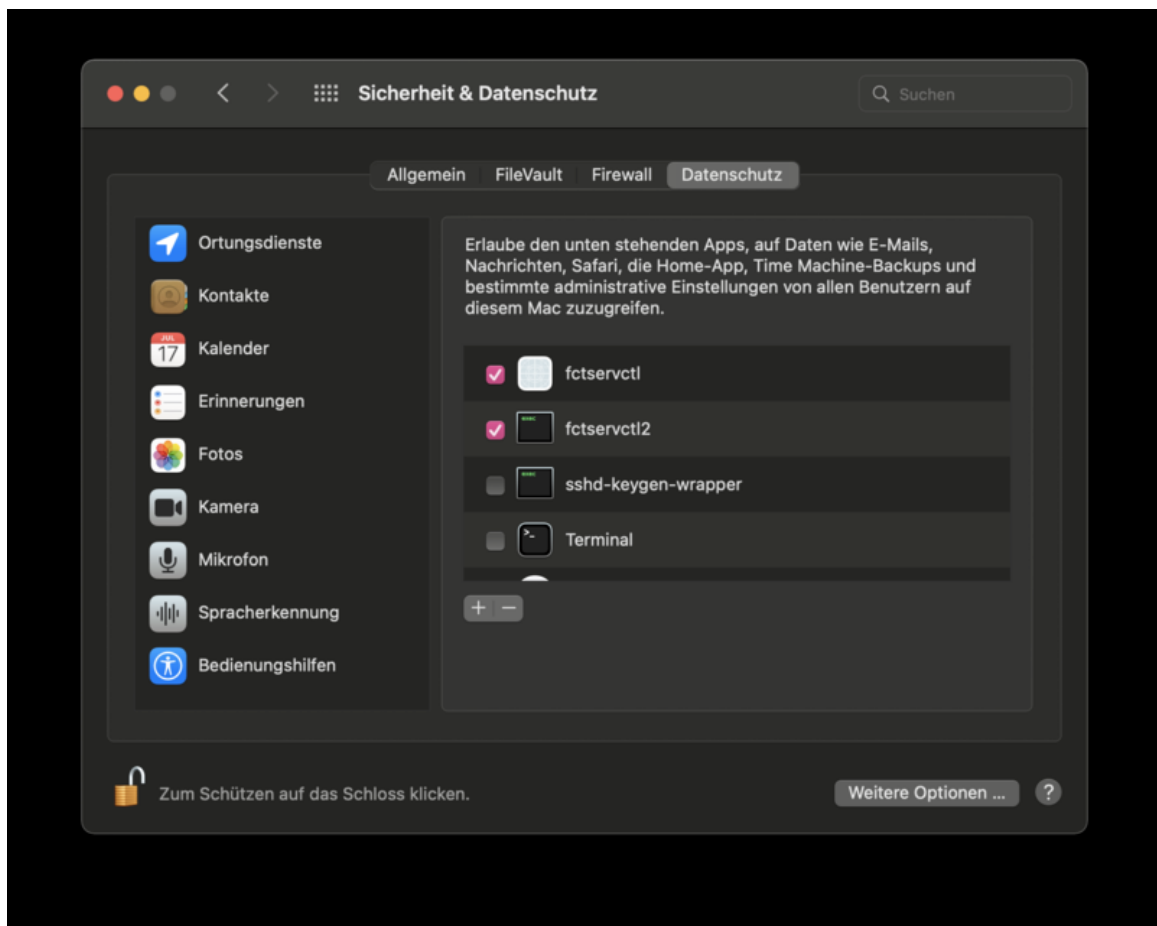

Please click on „Open File Access“. The following windows will open:

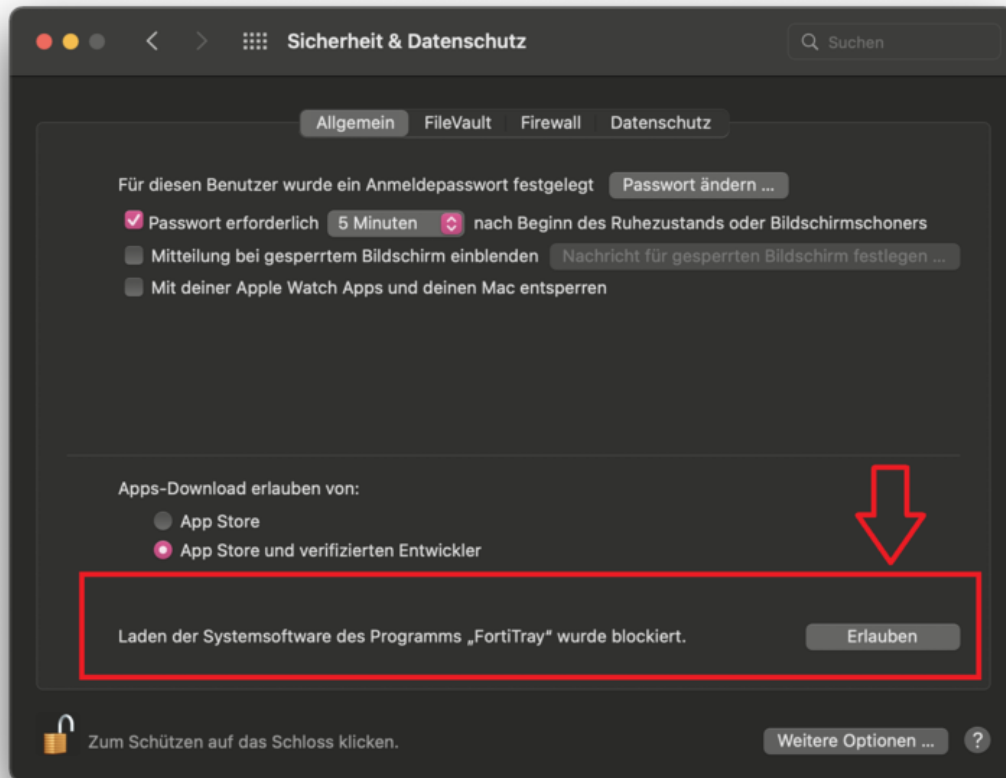

To edit, please click on the lock and log in with your admin account.

After logging in with an admin account, you can then tick the boxes for „fctservctl2“ and „FortiClient“:

Next to „Loading the system software of the „FortiTray“ programme has been blocked“, click on „Allow“.

After installation, create a new VPN connection under „REMOTE ACCESS“.

Connection Name: HAW-Landshut
Description: - Can be freely selected
Remote Gateway: vpn1.haw-landshut.de
Port: 443
